### **DETAILED ACTION**

The following action is in response to the amendment filed for application 10/691,293 on September 16, 2004.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 11 has been replaced with the following (to correct an improper dependency and to correct an non-compliant amendment):

11. The hybrid motor vehicle of Claim 1 wherein said second axle assembly includes a differential connected to said rotary member of said electric motor for driving a pair of drive axles, and wherein said third clutch includes a pair of clutches for selectively connecting each of said drive axles to a corresponding one of said second pair of wheels.

Claim 20 has been replaced with the following (same reasoning as of claim 11):

20. The four-wheel drive hybrid vehicle of Claim 13 further comprising a differential driven by said motor and a pair of driveshafts driven by said

Art Unit: 3681

differential, and wherein said third clutch includes a pair of clutches operable for selectively coupling each of said driveshafts to a corresponding one of said second pair of wheels.

In Claim 37:

on line 2, "firs" has been replaced with --first--.

#### ***Election/Restrictions***

Claims 1 and 13 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 11 and 20, directed to the species of transmission 2, are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Allowable Subject Matter***

Claims 1-4,7,8,10-15,17-24 and 30-39 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the hybrid motor as claimed, and particularly including a second clutch selectively coupling the transfer unit to a rotary member of an electric motor, releasing a first and second clutch, while actuating a third clutch, connecting the electric motor to a second axle assembly, during an electric drive mode, and including the remaining structure of claims 1, 13 and 22, respectively. The present invention also particularly includes actuating a first and third clutch, while releasing a second clutch, during a hybrid drive mode, and including the remaining structure of claims 30 and 31, respectively. The present invention also particularly includes a power transfer unit operably disposed between the engine and transmission, a second clutch operable for selectively coupling the motor shaft to the output member of the power transfer unit; a third clutch operable for selectively coupling the motor shaft to the front axle assembly, and including the remaining structure of claim 36.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
